

## **Installation Instructions** **Milan Series Platforms**

The Milan Series is compatible with all Grand Stands arms. In some cases, extra holes have been drilled in the platform to make it compatible. If used with 23500 Click!t Arm, a mounting plate will be provided (see 23500 Click!t instructions for mounting plate).

- 1) Align the four screw holes of the Milan Platform with four screw holes in the arm (often arms will have more than four, but four of them will line up).
- 2) From the top of the platform, insert four screws (included) through the aligned holes, and tighten with four cap nuts (included). If done correctly, the screw heads will be flush with the top of the platform.
- 3) Install the arm and track using the instructions provided for them.
